

MAKING CONNECTIONS

No matter the industry, Brennan provides high-performance critical flow components to keep your systems operating at their best. With **over 120,000 fittings, adapters, and accessories offered globally**, we stand behind our commitment to *Availability, Quality, Support, and Innovation* — because with Brennan, you're not just getting a product; you're making connections with a trusted partner.

QUALITY — Have confidence knowing our products are of such high quality performance, that they are reliable — even in space. They exceed industry standards backed by certifications for **ISO, AS9100D, and NADCAP** for aerospace. Advanced testing in our corrosive salt spray chamber and ISO Class 8 cleanroom adds an extra layer to this superior quality.

AVAILABILITY — With a global distribution network, we ensure **fast, reliable delivery**. Our strategically placed distribution centers keep products stocked and ready for you.

SUPPORT — We offer more than products. We provide expertise before and after your purchase, because with us, you gain a partner in your success. Access **educational resources through Brennan University** or contact our **expert customer service and sales reps** via *phone or email* for real-time support.

INNOVATION — Technology is at the forefront of **who we are** and how we remain a **leader in our industry**. We streamline your operations through advanced manufacturing equipment, AI-powered tools, supply chain forecasting, e-commerce, CAD files, product data & images, cross-reference tools, and batch-code traceability.

Our semi-automated weight-counting verification system minimizes errors to near zero.

Our proprietary cross-reference tool with over 200,000 references, helping you match the part you need to a Brennan equivalent.

Our demand forecasting technology that anticipates inventory needs, and safety stock agreements that help ensure critical products are available when you need them.

PRODUCTS

Hydraulic fittings and adapters are at the core of what we do, supported by a broad range of complementary fluid power and connection products to meet your system needs. From a single component to a complete connection solution, Brennan brings it all together from one trusted source.

Hydraulic Fittings & Adapters

Instrumentation Fittings & Valves

Industrial Fittings & Valves

Hose, Tubing, & Assemblies

**Available in Brazil*

**Product availability varies by country.*

Hose Protection & Accessories

Clamps & Supporting Systems

Cylinders & Motion Products

**Available in Brazil*

Diagnostics & Accessories

CAPABILITIES

MANUFACTURING

With numerous certified facilities across the world, Brennan's manufacturing expertise is unmatched in the industry.

Material Options: Carbon Steel, Stainless Steel, Brass, Aluminum and other Exotic Alloys (i.e. Inconel and Monel). *Availability Varies By Country.*

Forging: Standard fittings use steel forgings for fewer leak points and a stronger metal body. Custom forgings can be developed for customer-specific applications to ensure top-tier performance.

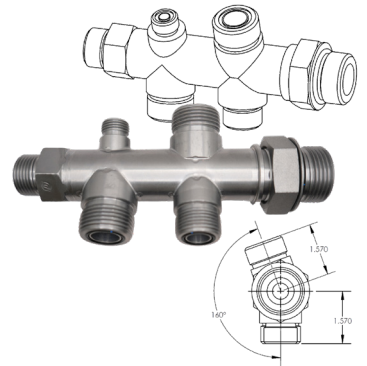

Brazing & Welding Processes: If a product design does not allow for a forging, Brennan has brazing and welding capabilities that will maintain the quality of the product.

Bent Tubes: For specific applications, we also offer bent tube, swept versions of various types of fittings.

Finishing Options: Clear Zinc, Zinc Nickel, Anodize, Unplated, Passivated.

CUSTOM ENGINEERING

Custom-engineered connections and specialized components designed to meet your unique application requirements.

TESTING

In-house testing capabilities and access to ample third-party testing labs to meet customer requirements.

Select Brennan Facilities: Corrosion Salt Spray Test Chamber per ASTM B117 Standards Class 8 Cleanroom testing to ISO 16232 Standards

Third-Party Testing: Working pressure, material composition, and torque. Others available upon request.

QUALITY ASSURANCE

We meet or exceed quality standards including DIN, ISO, ASTM, NADCAP, and AS9100, while supporting customer PPAP specifications. Each part is stamped with the Brennan logo and batch code for full product traceability.
